

TECNIMOPLAS
MOLDS FOR PLASTICS

MOULDING EXCELLENCE

SINCE 1971

PORTUGAL

FROM
FIRST
DESIGN

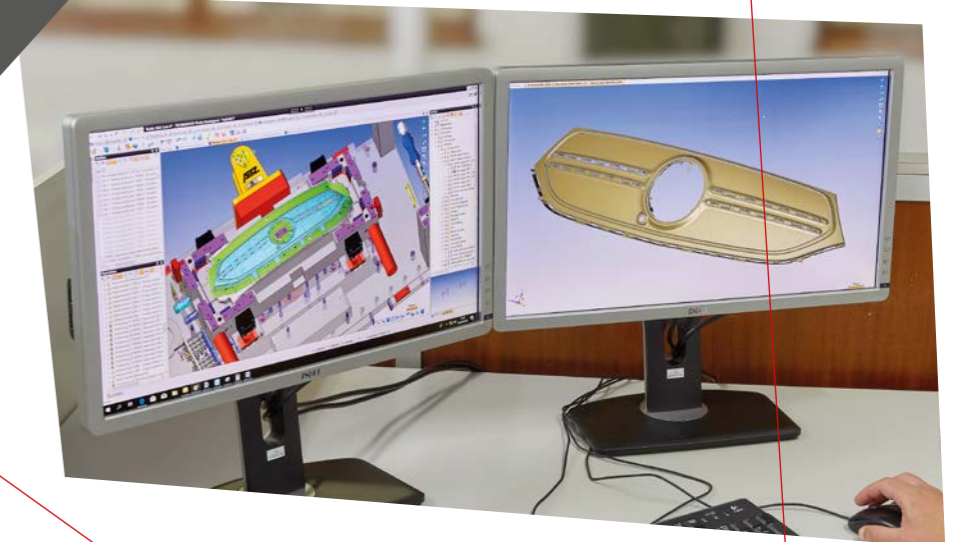

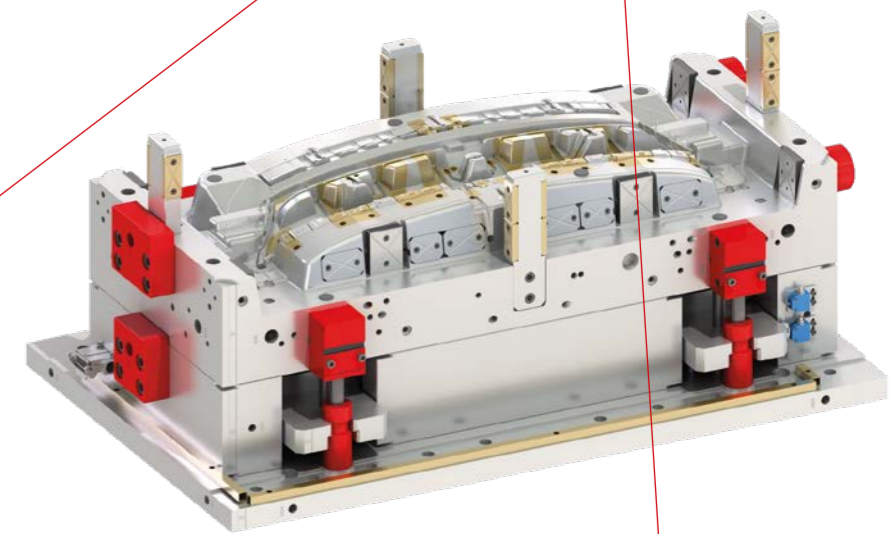

A TEAM HIGHLY SKILLED
AND EXPERIENCED

TO THE
FINAL
PRODUCT

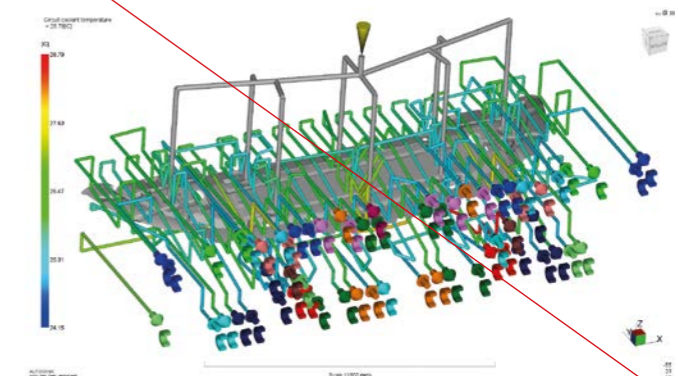

Tecnimoplás, founded in 1971, was one of the pioneer companies that turned Marinha Grande into one of the biggest mould producing centers in the world. We design and manufacture precision moulds, mainly for the plastic industry.

Quality, meeting delivery deadlines and honesty have always been constant concerns ever since the company was founded, which has contributed to the sustained development of our competitiveness.

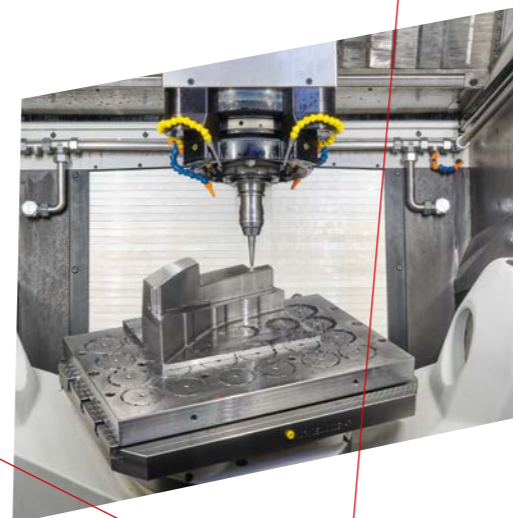

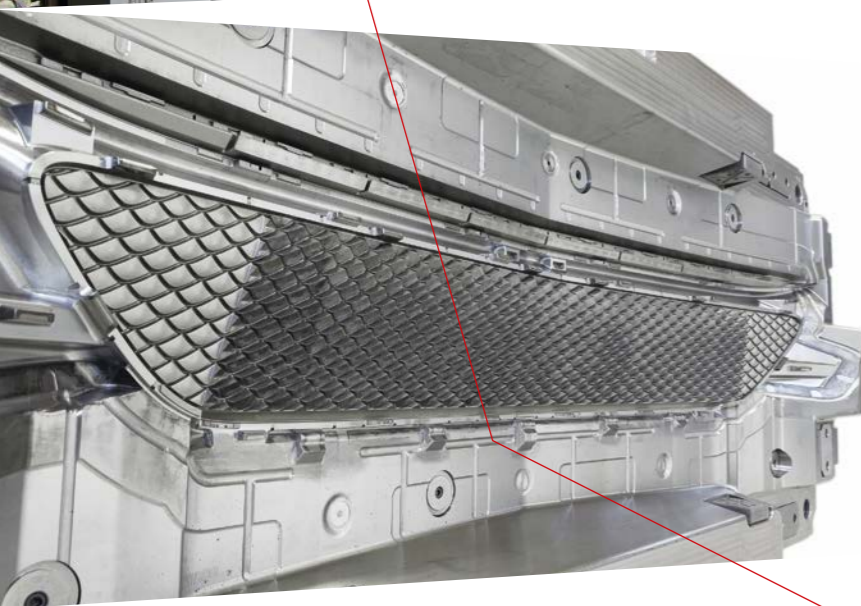

DESIGNING
FORWARD

Establishing efficient cooperation with the client, carefully designing and planning each mould according to requirements. In this partnership, you will find a range of solutions, creativity and innovation. The conception and development of products has been a fundamental support area we provide for our clients.

PRODUCTION
INNOVATION
& TECHNOLOGY

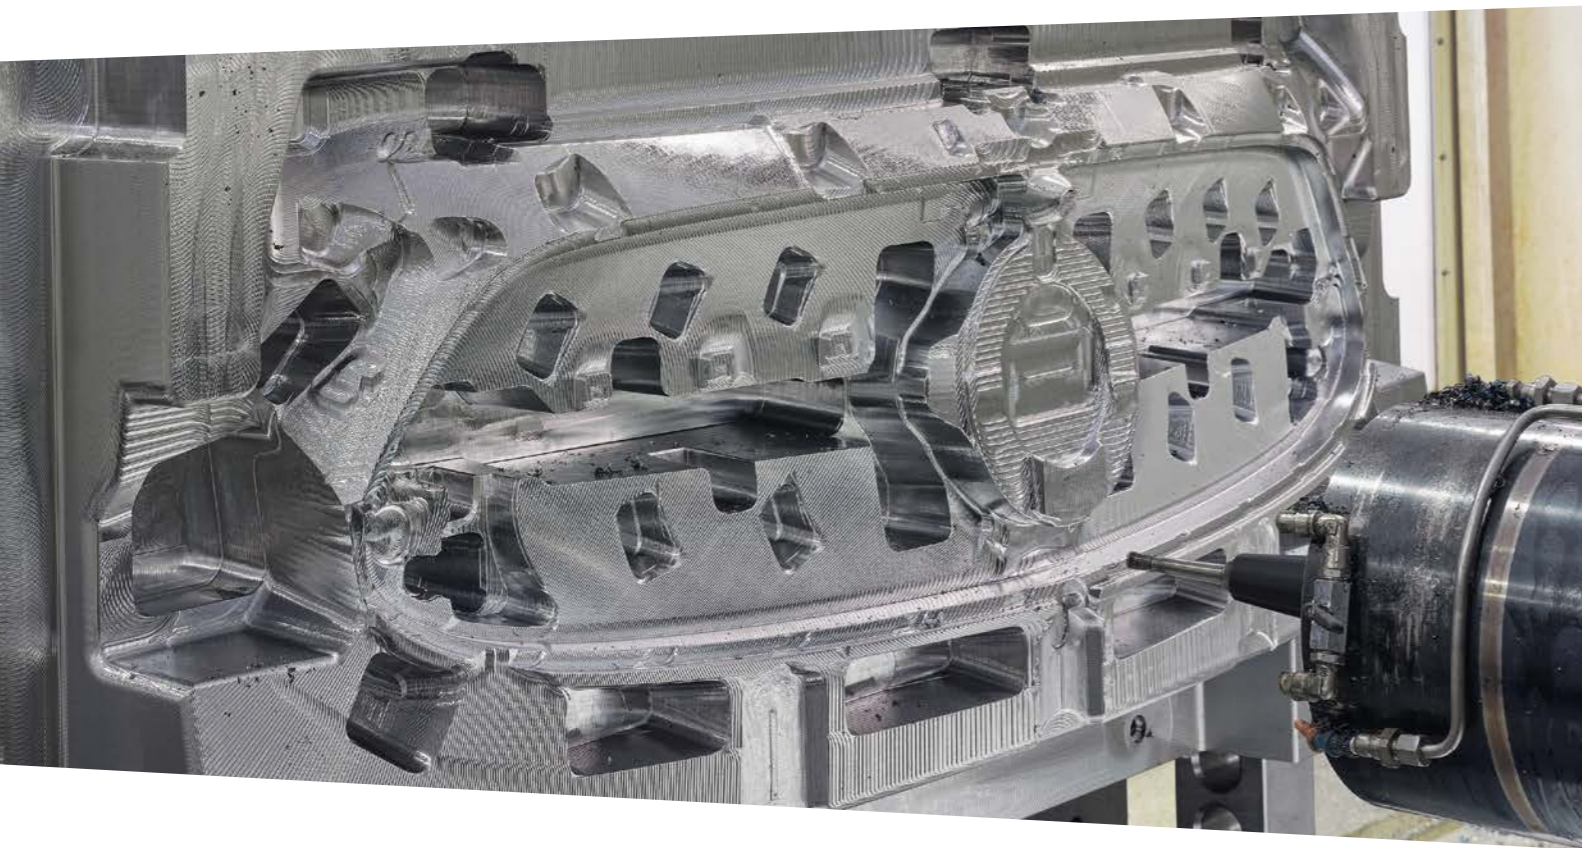

Based on a business philosophy of constantly improving methods and work processes which guarantee total client satisfaction, Tecnimoplás has an array of resources which can produce high quality moulds up to 30 tons. Flexibility and quick response are factors that determine the relationships we have with our client-partners.

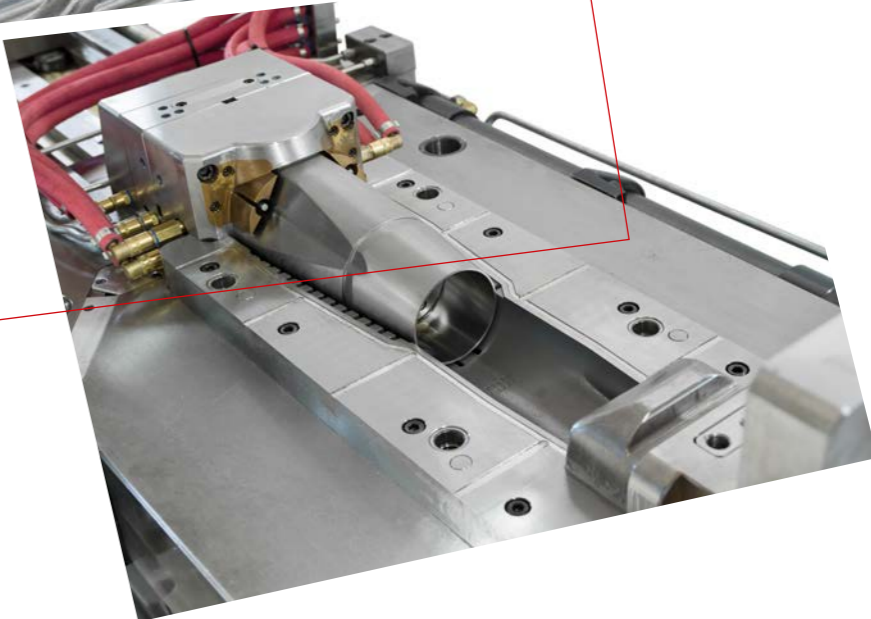

**PRODUCTION
METHOD,
PRECISION
& ACCURACY**

The technical capacity of our work team, together with their extensive experience, added to command of the most up-to-date technologies, allow us to produce a functional mould with high levels of rigour and reliability, within the timescale agreed with the client.

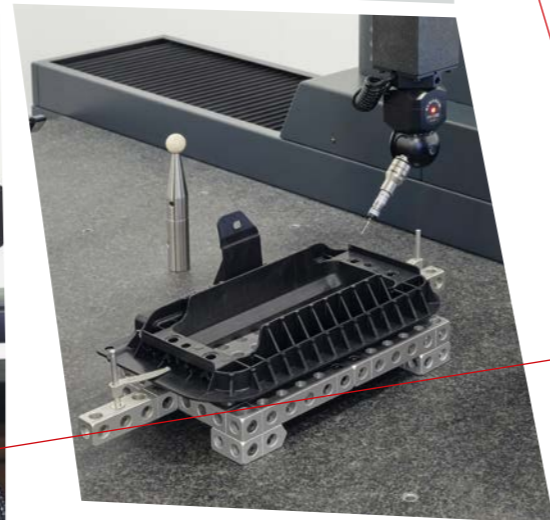

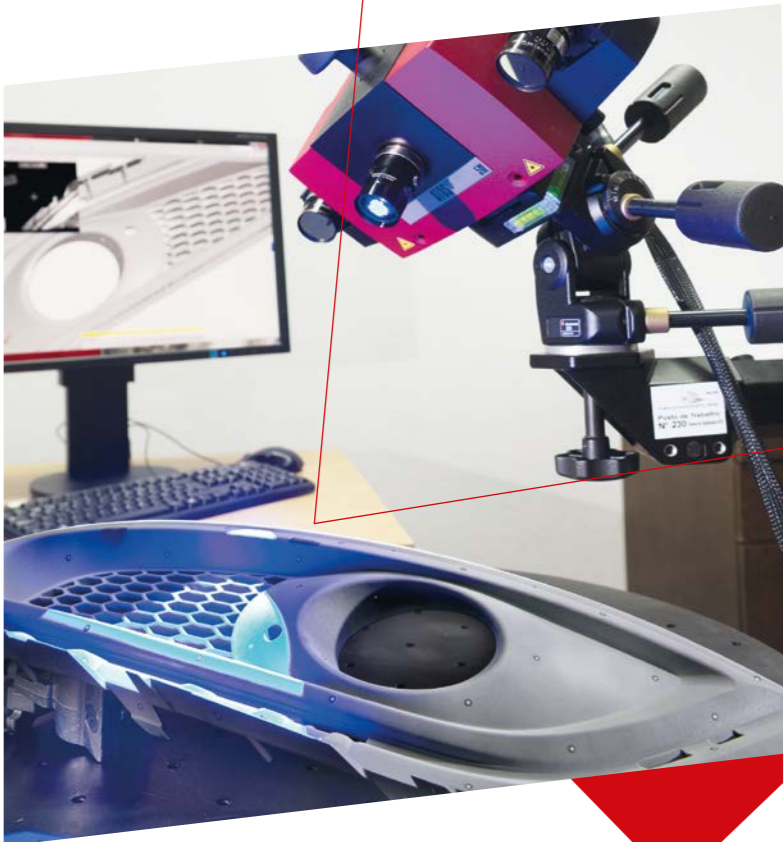

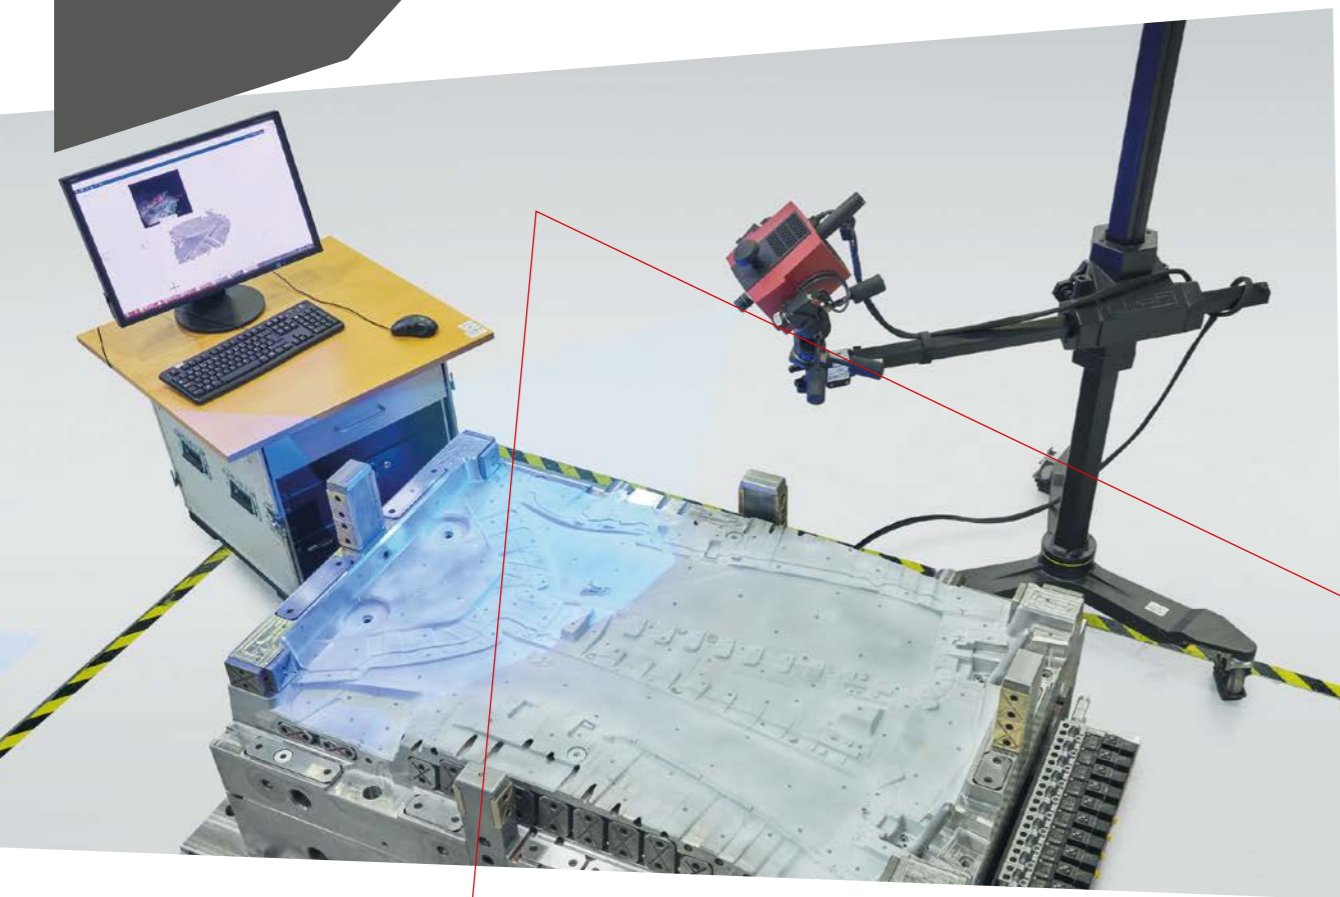

The different production phases are rigorously planned and controlled such that we can detect any deviations from plan and act in real time, with minimum loss of time and productivity.

QUALITY
AND TESTING

During the production process, rigorous control over dimensions is essential to ensure that the design specifications are strictly met, guaranteeing the construction of a top quality mould.

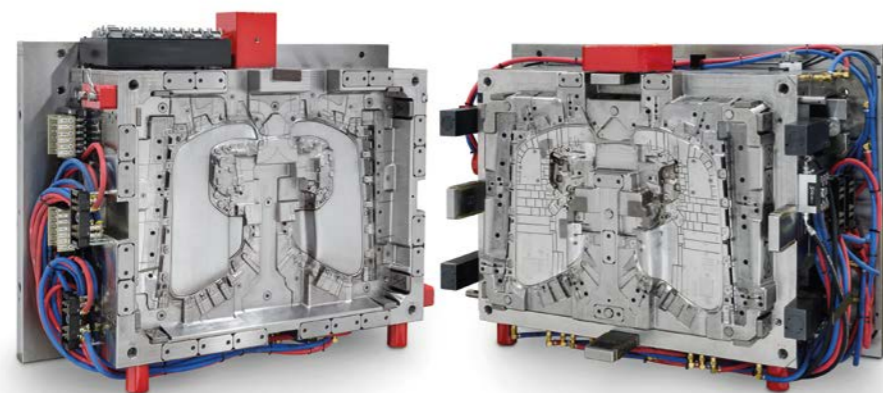

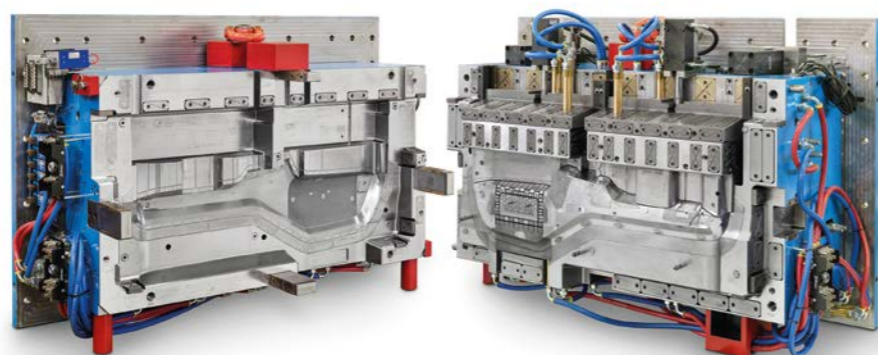

The final quality of the mould results from the rigour and precision achieved at each stage of its construction.

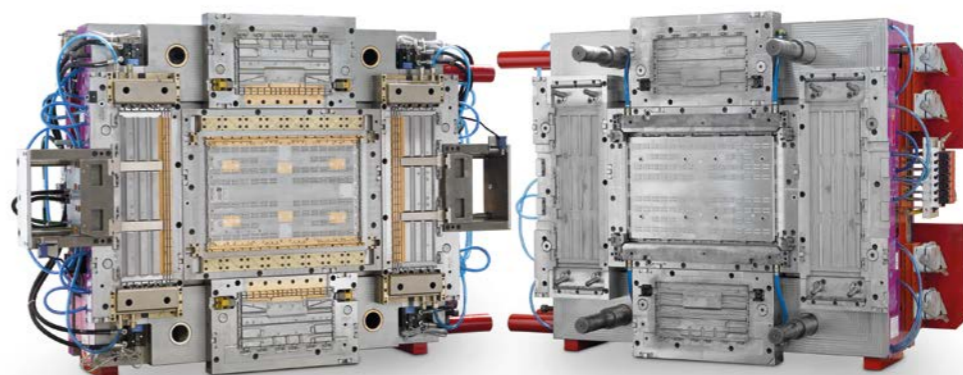

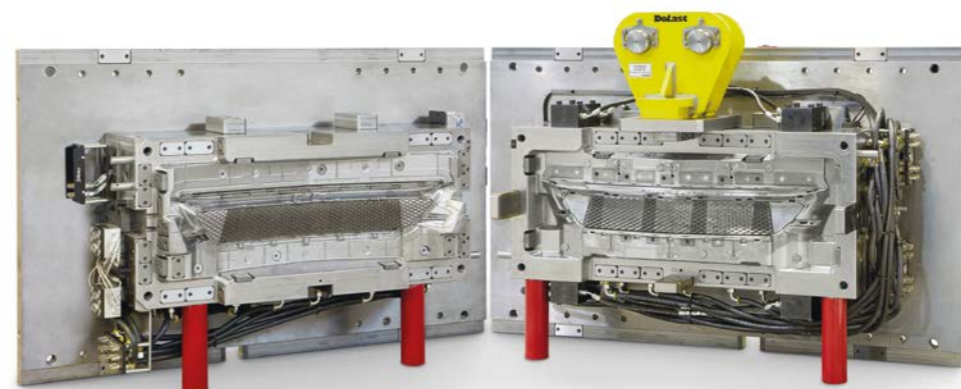

That is why all moulds are tested at our try-out center in conditions identical to those of production and are monitored to guarantee an ideal product. Excellence is our goal.
